DETAILED ACTION

Election/Restrictions

Claims 18-23 and 41-43 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 3-27-07.

This application is in condition for allowance except for the presence of claims 18-23 and 41-43 directed to inventions non-elected without traverse. Accordingly, claims 18-23 and 41-43 have been cancelled.

Allowable Subject Matter

Claims 44-50 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 44-47.

Specifically regarding claim 44, Fujishima et al. (6788389) teaches the state of the art of a projection optical system.

But, Fujishima et al. fails to explicitly teach a combination of all the claimed features including the pattern on the mask includes a repetitive pattern and a repetitive

direction of the repetitive pattern differs from directions of two axes that are perpendicular to the $[0\ 0\ 1]$ axis of the isometric crystal, as claimed.

Specifically regarding claims 45 and 47, Fujishima et al. (6788389) teaches the state of the art of a projection optical system.

But, Fujishima et al. fails to explicitly teach a combination of all the claimed features including the pattern on the mask includes a repetitive pattern and a repetitive direction of the repetitive pattern forms one of angles of 0 degrees, 45 degrees or 90 degrees with respect to a primary direction on a plane that includes the mask, as claimed.

Specifically regarding claim 46, Fujishima et al. (6788389) teaches the state of the art of a projection optical system.

But, Fujishima et al. fails to explicitly teach a combination of all the claimed features including the pattern on the mask includes a repetitive pattern and a repetitive direction of the repetitive pattern differs from directions of $[1\ 0\ 0]$ and $[0\ 1\ 0]$ axes that are perpendicular to the $[0\ 0\ 1]$ axis of the isometric crystal, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
